

Recommended Practices for the Design and Installation of Fueling Systems for Emergency Generators, Stationary Diesel Engines and Oil Burner Systems

CONTENTS

Foreword	iii
-----------------------	------------

SECTIONS

1. Introduction	1
1.1 Origin	1
1.2 Background	1
1.3 Purpose	1
1.4 Scope	1
1.5 Sources	2
1.6 Use of Other PEI Recommended Practices	2
1.7 Importance of Competent Installers	2
1.8 Written Plans and Specifications	2
1.9 Regulations and Approval of AHJs.....	2
1.10 Standards for Emergency and Standby Power Systems	2
1.11 Standards for Stationary Pumps for Fire Protection	3
2. Definitions	4
2.1 Aboveground Storage Tank (AST)	4
2.2 Approved.....	4
2.3 Authority Having Jurisdiction (AHJ)	4
2.4 Automatic Transfer Switch (ATS).....	4
2.5 Cathodic Protection	4
2.6 Class A Operator	4
2.7 Class B Operator	4
2.8 Class C Operator	4
2.9 Day Tank	4
2.10 Design Capacity	4
2.11 Diesel Fuel.....	4
2.12 Dike	4
2.13 Double-Walled Tank.....	4
2.14 Emergency Power Supply System (EPSS)	4
2.15 Emergency Vent	4
2.16 Fire Rating	4
2.17 Flow Diffuser	4
2.18 Fuel Supplied Burner System (FSBS)	4
2.19 Fueling Systems	4
2.20 Fusible Link.....	4
2.21 Galvanic Cathodic Protection	4
2.22 Generator.....	4
2.23 Impressed-Current Cathodic Protection.....	4
2.24 Interstitial Space.....	5
2.25 Isolation Valve.....	5
2.26 Leak Detection	5
2.27 Listed	5
2.28 Main Tank.....	5
2.29 Off-Loading System.....	5
2.30 Priming Tee	5
2.31 Protected Tank.....	5
2.32 Pump Set	5
2.33 Remote Fill.....	5
2.34 Rupture Basin.....	5
2.35 Sensitive Receptor.....	5

2.36	Shop-Fabricated Tank.....	5
2.37	Spill Bucket.....	5
2.38	Sub-Base Tank.....	5
2.39	Tank System	5
2.40	Underground Storage Tank (UST).....	5
2.41	Vault	5
3.	Storage Tanks and Placement.....	6
3.1	General	6
3.2	Types of Tanks	6
3.2.1	Underground Storage Tanks (USTs)	6
3.2.2	Aboveground Storage Tanks (ASTs)	6
3.2.3	Day Tanks.....	6
3.2.4	Sub-Base Tanks (Belly Tanks and Base Tanks).....	7
3.3	Tank Location on Property/Building.....	7
3.3.1	Traffic Flow Considerations and Delivery Truck Access/Off-Loading.....	7
3.3.2	Tank System Protection (Fencing/Bollards).....	8
3.3.3	Catastrophic Events and Emergency Planning.....	8
4.	Tank Installation	9
4.1	General	9
4.2	Source Tanks	9
4.2.1	AST Installation	9
4.2.2	UST Installation	11
4.3	Sub-Base Tank Installation.....	11
4.3.1	Foundation.....	11
4.3.2	Vehicle Impact Protection	11
4.4	Day Tank Installation	11
4.5	Secondary Containment	11
5.	Piping and Components	13
5.1	General	13
5.2	Piping Materials	13
5.2.1	Aboveground Piping	13
5.2.2	Underground Piping	13
5.2.3	Combination of Aboveground and Underground Piping.....	13
5.3	Pipe Sizing.....	14
5.3.1	Supply Piping.....	14
5.3.2	Return Piping	14
5.3.3	Day Tank Overflow Piping	14
5.4	Normal and Emergency Vent Piping.....	14
5.4.1	Normal Vent Piping.....	14
5.4.2	Emergency Vent Piping.....	15
5.5	Fill Piping.....	15
5.5.1	Drop Tubes.....	15
5.5.2	UST Fill Piping	15
5.5.3	AST Fill Piping	15
5.6	Piping Penetrations.....	15
5.7	Piping Support.....	16
5.7.1	Aboveground Piping Support	16
5.7.2	Other Considerations.....	16
5.8	Valves	16
5.8.1	Anti-Siphon Devices	16
5.8.2	Check Valves	16
5.8.3	Thermal Expansion Relief Valves.....	16
5.8.4	Pressure Regulating Valves.....	16
5.8.5	Oil Safety Valves (OSVs)	16
5.8.6	Fire Valves.....	17

5.9	Strainers.....	17
5.10	Sight Flow Indicators	17
5.11	Flexible Connectors	17
6.	Pump and Controls	18
6.1	General	18
6.2	Fueling System Controls.....	18
6.2.1	Fueling System Control Categories	18
6.3	Master Control Panels	19
6.4	Day Tank Float/Level Controls.....	19
6.5	Switches	19
6.5.1	On/Off Switch	19
6.5.2	Hand Off Auto (HOA) Switch.....	19
6.5.3	Pressure Switch.....	19
6.5.4	Flow Switch	19
6.5.5	Main Disconnect Switch.....	19
6.5.6	Emergency Stop Switch.....	19
6.5.7	Float Level Switch	19
6.5.8	Valve Position Indicator Switch.....	20
6.6	Monitoring.....	20
6.6.1	Leak and Level Monitoring Equipment.....	20
6.6.2	Leak Detection	20
6.6.3	Automatic Line Leak Detectors and Continuous Leak Detection Systems	20
6.6.4	Generator Run Monitoring.....	21
6.6.5	Fuel Temperature Monitoring	21
6.7	Pumps	21
6.7.1	Submersible Turbine Pumps (STPs).....	22
6.7.2	Suction Pumps.....	22
6.7.3	Return Pumps	22
6.7.4	Manually Operated Hand Pumps.....	22
6.8	Pump Location	22
6.8.1	Anchoring Pumps.....	22
7.	Electrical.....	23
7.1	Importance of Electrical Work	23
7.2	General Requirements	23
7.3	Leak Detection and Cathodic Protection Systems	23
7.4	Grounding and Bonding.....	23
7.5	Ensuring Uninterrupted Power.....	24
8.	Accessories	25
8.1	Overfill Prevention.....	25
8.1.1	Underground Storage Tank (UST) Overfill Prevention.....	25
8.1.2	Aboveground Storage Tank (AST) Overfill Prevention.....	25
8.1.3	Day Tank Overfill Prevention	25
8.1.4	Sub-Base Tank Overfill Prevention	25
8.1.5	Tanks Located Inside a Building	25
8.2	Spill Protection.....	25
8.2.1	Fill Port	25
8.3	Aboveground Tank Signage and Labeling.....	26
8.4	Posted Signs	26
8.5	Ladders, Stairways and Platforms.....	27
8.5.1	Ladders	27
8.5.2	Stairways	27
8.5.3	Platforms	27
8.6	Spill Kits.....	27

9. Testing	28
9.1 System Tests	28
9.2 Test Results	28
9.3 Other Testing	28
10. Fuel Quality Considerations.....	30
10.1 General	30
10.2 Types of Fuel to Use	30
10.3 Design Decisions Affecting Fuel Quality	30
10.4 Fueling Policy Prior to Receiving Fuel.....	30
10.5 Fueling Policy Post Installation	30
10.5.1 Filtration.....	30
10.5.2 Fuel Polishing	30
10.5.3 Additives	31
10.6 Tank Water Removal.....	31
10.7 Fuel Storage Life.....	31
11. Emergency Preparedness	32
11.1 General	32
11.2 Seasonal Factors or Weather Emergencies	32
11.3 Spill Prevention, Control, and Countermeasure (SPCC) Plans	32
11.4 Emergency Planning	32
12. Notifications, Registrations, Documentation and Training	33
12.1 Regulatory Notifications and Permitting	33
12.1.1 Regulatory Notifications	33
12.1.2 Regulatory Tank Permitting	33
12.1.3 Regulatory Air Permitting.....	33
12.2 Documentation and Records Retention.....	33
12.3 Leak Detection Records	33
12.4 Training	33
